

Mirror Group Cancer Mission Spain

Rosario Perona (ISCIII) & Marta Gómez Quintanilla (CDTI)

PRESIDENCIA ESPAÑOLA
CONSEJO DE LA UNIÓN EUROPEA

Spanish Mirror Group Cancer Mission

- **Core Group**
- **Extended Group**

Relevant stakeholders in the field, such as:

- Public administrations: Research and Innovation Ministry, Health Ministry, ISCIII, CDTI, FECYT...
- Patients (organizations/advocates),
- Researchers and Innovators,
- Medical Societies and representation of other health workers
- Industrial associations,
- Others

Relevant activities

- Dialogue and Information Exchange: consultations, emails, meetings...
- Informative events/workshops for a wider audience
- Mapping activities
- Policy events
- Funding
 - Launching of National / regional calls
 - Participation in international calls

Spanish participation in EU

Spain is participating in all strategic projects/initiatives:

- **UNCAN.eu** - European Federated Cancer Research data hub
- **ECHoS** - Cancer Mission Hubs
- **Joint Action CraNE & CCI4EU** - Comprehensive Cancer Centres/Infrastructures

Spanish participation in **Horizon Europe Calls (& other EU)**:

- Great numbers in participation and success rate
- Coordination of projects in all Mission Cancer Clusters

Activities contributing to the Cancer Mission objectives by Ministry of Science and Innovation (1)

- The strategy in the last three years is focused on funding (by grants, loans, credits, etc.) cancer financing schemes that strengthen public health institutions, research groups and also industry by financing projects, hospital infrastructures and industry.
- Spanish Government implemented a **strategic project for economic recovery and transformation (PERTE)** from EU funds that refers to innovative procedures to improve the **prevention, diagnosis, treatment and rehabilitation** of patients in a personalized way.
- Research structures have been created such as **IMPACT** programme, a **precision medicine infrastructure** associated with science and technology configured by three programmes, predictive medicine, data science and genomic medicine.

Activities contributing to the Cancer Mission objectives by Ministry of Science and Innovation (2)

- The Instituto de Salud Carlos III (ISCIII) that implemented the IMPaCT programme also financed a **personalized medicine programme** (EU funds) to **implement in clinical practice** that drives those research results to the service of citizen's care in public hospitals.
- In addition in collaboration with the Centre for the Development of Technology and Innovation (CDTI), research projects have been **implemented, coordinating groups from research institutions and industry** to transfer research results to clinical practice.
- Along with this strategy ISCIII has issued a call for the Creation of an R&D+i structure for **advanced network therapies named CERTERA**, that allows the existing designs to be structured throughout the whole country.

Next Step: Presidency event

 GOBIERNO DE ESPAÑA
MINISTERIO DE CIENCIA E INNOVACIÓN
