

IF YOU WANT, YOU CAN

If you want, you can avoid unwanted pregnancy. **It's easy. Just use a condom.** It also prevents the HIV virus and other sexually transmitted diseases.

IT TAKES TWO

It doesn't matter which of you is carrying one. It doesn't matter if it's the boy or the girl. What matters is using a condom, because unwanted pregnancy means changing your life. **Choosing your method of contraception together** is a wise thing.

CARRY ONE ON YOU

Lack of foresight is your worst enemy. Not carrying a condom in your pocket, might lead you to have unprotected sex. Do you really want to run that risk? To avoid unwanted pregnancy, **always carry one on you.**

I YOU
