BY ACTING RESPONSIBLY, WE GAIN IN HEALTH

Public resources belong to all citizens. Healthcare too.
We must care for it and use it properly so that we can benefit from it when we need it.

Primary Healthcare Centres offer consultations for common pains as well as emergency care.
Hospital Emergency Services attend to more serious cases requiring immediate care.

Your Healthcare Centre, where your doctor has your complete medical history, is where they know you best and so can care for you best, informing you on what actions to take in each situation.
