

Informe anual  
del Sistema Nacional  
de Salud 2009  
Anexo: “Publicaciones de las  
Comunidades y Ciudades  
Autónomas”

## **Trabajos publicados durante el año 2009 indexados en el Índice Médico Español, MEDLINE o ISI Web of knowledge**

El comité editorial del Informe anual del Sistema Nacional de Salud 2009 consideró de interés poder disponer de información exhaustiva sobre la producción científica en el Sistema Nacional de Salud (SNS). Para ello se solicitó a las comunidades autónomas información detallada sobre las publicaciones indexadas en el Índice Médico Español, MEDLINE o *ISI Web of knowledge*.

El formato de respuestas recibidas ha sido muy heterogéneo. Algunas comunidades han facilitado una lista completa y exhaustiva de todas sus publicaciones, otras informan del número global (Aragón con 366 publicaciones), otras comunidades desglosan los trabajos por centros (Valencia), o por índices (Cataluña) y otras elaboran un informe sobre el factor de impacto de sus publicaciones (Cantabria, Galicia). Por otra parte, algunas comunidades no han podido facilitar la información solicitada, lo que naturalmente no quiere decir que esas publicaciones no se hayan producido.

A pesar de todas estas dificultades se ha considerado que incluir este anexo en el Informe anual del SNS era un primer paso para en años sucesivos poder profundizar en el estudio de la producción científica del SNS.

El número total de publicaciones del Sistema Sanitario Público de Andalucía con visibilidad internacional<sup>1</sup> en 2009 es de 2.728 artículos, lo que representa un incremento del 12,3% con respecto al año anterior (2.391 artículos en 2008).

El número de trabajos publicados en revistas con Factor de Impacto es de 1.153, un 14.5% superior a los publicados en 2008 (986 artículos). En el cómputo, se excluyen los trabajos con la siguiente tipología documental: letter, meeting abstracts y Erratum.

Los documentos han sido localizados en las bases de datos Web of Science<sup>2</sup>, Scopus<sup>3</sup>, MEDLINE<sup>4</sup> y CINAHL<sup>5</sup>. La estrategia de búsqueda ha incluido el nombre de las ocho provincias andaluzas en español (Almería, Cádiz, Córdoba, Granada, Huelva, Jaén, Málaga y Sevilla) y Seville (en inglés) en el campo de recuperación *Address* junto con los nombres de los centros asistenciales (hospitales, distritos sanitarios de Atención Primaria), de investigación, docentes y de gestión, así como el año 2009 en el campo *Year*. Con el objeto de localizar las publicaciones de los centros de Atención Primaria, se han incluido también las ciudades y pueblos cuando ha sido necesario.

Sólo las bases de datos bibliométricas (WoS y Scopus) incluyen la dirección de todos los firmantes; en el caso de las bases de datos bibliográficas MEDLINE y CINAHL, que únicamente indizan la dirección del primer firmante, se ha contrastado con la información proporcionada por las bibliotecas del SSPA.

Se ha procedido a normalizar la variabilidad de nombres de centros con que firman los autores o que son recogidos en las bases de datos, de manera que se ha adjudicado cada artículo al nombre oficial con que es conocido el centro.

Cada artículo ha sido asignado a cada uno de los centros del SSPA al que pertenecen sus firmantes, constatando así la colaboración científica. Así pues, la suma de las partes siempre será superior al total.
