

Anexo gráfico (Parte 2)

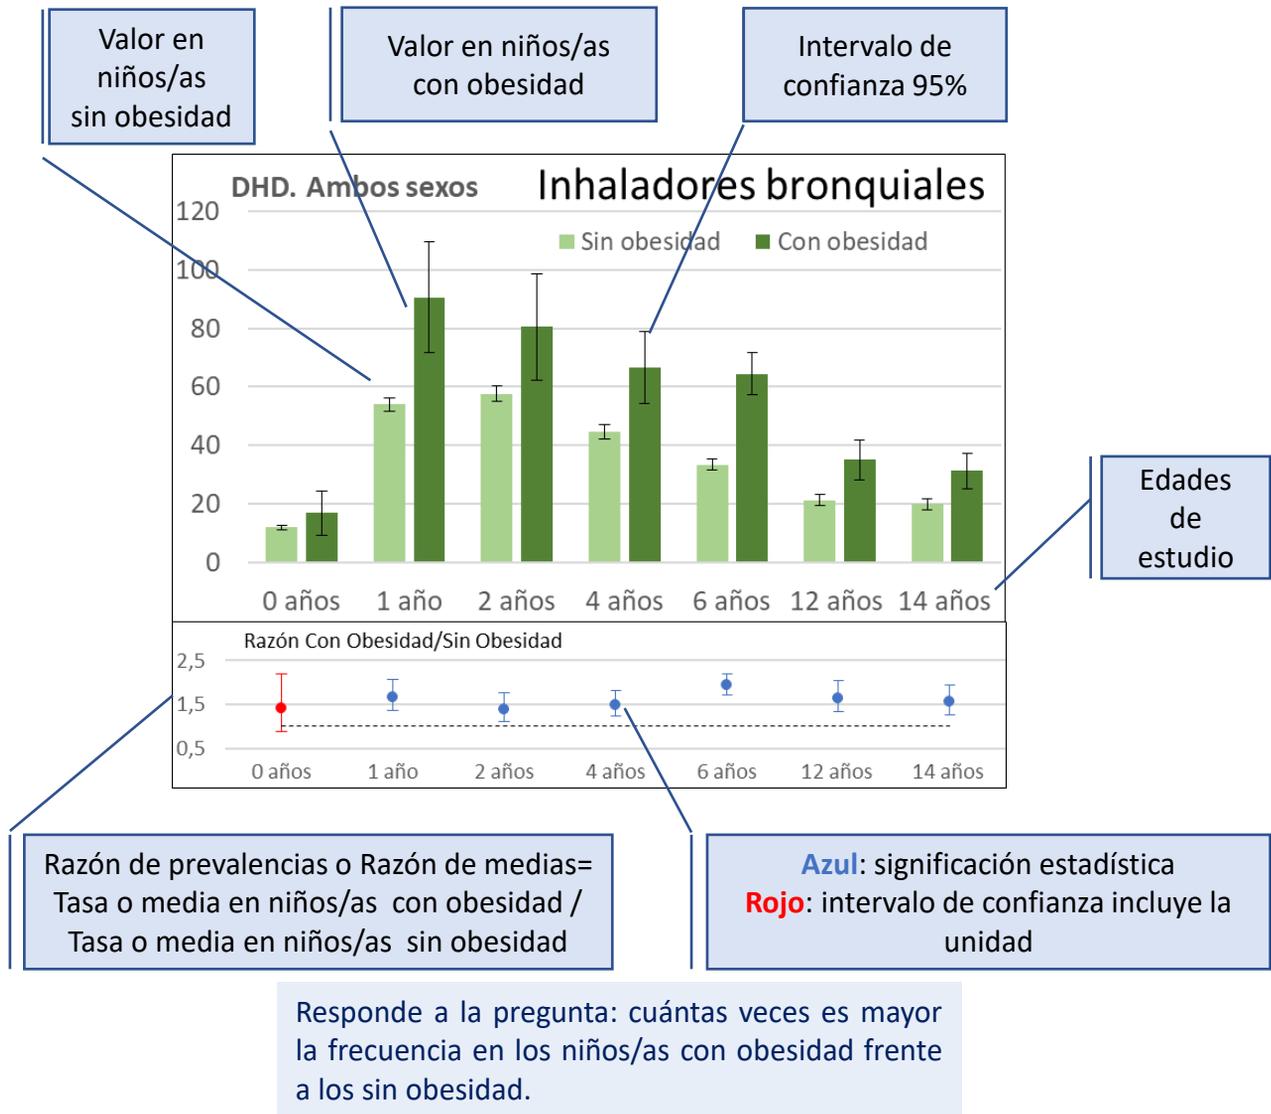

Caracterización de la población infantil según la presencia/ausencia de obesidad

Prevalencias o medias por edad y sexo

Razón de prevalencias o razón de medias por edad y sexo (entre personas con obesidad / sin obesidad).

Edades de estudio: 0, 1, 2, 4, 6, 12 y 14 años

Índice	
Claves de lectura	<u>2</u>
1. Problemas de salud	<u>3</u>
a) Resumen: los 45 problemas de salud por aparatos	<u>4</u>
b) Prevalencia en cada edad	<u>5</u>
c) Razón de prevalencias en cada edad	<u>10</u>
2. Frecuentación en atención primaria (visitas)	<u>27</u>
3. Interconsultas	<u>29</u>
a) Interconsultas totales por mil y razón de medias	<u>30</u>
b) Interconsultas en cada especialidad	<u>31</u>
c) Razón de interconsultas de las especialidades en cada edad y sexo	<u>46</u>
4. Utilización de procedimientos	<u>53</u>
5. Utilización de fármacos	<u>58</u>
a) Total de DHD y razón de medias	<u>59</u>
b) Resumen: 13 ATC por aparatos	<u>60</u>
c) DHD en cada grupo ATC2	<u>61</u>
d) Razón de DHD de los ATC2 en cada edad y sexo	<u>80</u>
6. Parámetros nutricionales	<u>82</u>

Criterios de selección

Problemas de salud: prevalencia $\geq 1\%$ y razón de prevalencias $\geq 1,2$

Visitas: todo contacto con atención primaria

Interconsultas: todas para el total y, para el análisis de especialidades, aquellas con frecuencia ≥ 10 y razón de prevalencias $\geq 1,2$.

Procedimientos: todos

Fármacos: todos para el total y, para el análisis de los ATC, los 5 más frecuentes en cada y edad y razón de prevalencias $\geq 1,2$.

1. Problemas de salud

- a) Resumen: 45 problemas de salud por aparatos.
- b) Prevalencia en cada edad.
- c) Razón de prevalencias en cada edad.

1.a) Resumen: 45 problemas de salud por aparatos

Razón de prevalencias: responde a la pregunta: cuántas veces es mayor la frecuencia del PS en las personas con obesidad frente a las sin obesidad.

Clave de lectura

Se muestran los problemas de salud con prevalencia superior al 1% y con razón de prevalencias (entre personas con y sin obesidad) mayor o igual a 1,20

El sombreado indica que el intervalo de confianza de la razón de prevalencia es estadísticamente significativo (95%).

M indica solo en mujer

H indica solo en hombre

Problema de salud	Edades / razón de prevalencia				
	14	12	6	4	0
Problemas sociales	1,5	1,5	1,3	1,5	
Anomalías congénitas					1,3

PS	Edada						
	14	12	6	4	2	1	0
Síntomas psicológicos	1,3	1,3	1,3	1,3	1,6	1,5-M	1,5
T. personalidad	1,9	1,6	1,3	1,8			
T. hiperclínicos	1,2	1,3	1,4	2,0			
T. ansiedad	1,3	1,4	1,4	2			
Depresión	1,6	1,9					
Estrés postraumático	1,8	1,4	1,6				
T. somatización	1,6-M		1,7				

Problema de salud	Edades / razón de prevalencia					
	14	12	6	4	2	1
Epilepsia	1,4	1,2-M	1,2	1,4	1,6-H	2,7
Alt. Lenguaje	1,4	1,9	1,9	1,9	1,7-M	
Cefaleas	1,2-H		1,2	1,4		

Problema de salud	Edades / razón de prevalencia		
	14	12	6
Ceguera	1,3	1,5	1,3-M

Problema de salud	Edades / razón de prevalencia		
	14	12	6
Hipertensión arterial	7,4	6,7	4,8

Problema de salud	Edades / razón de prevalencia						
	14	12	6	4	2	1	0
Asma	1,3	1,5	1,6	1,2-H	1,7	1,4	2,4
Síntomas respiratorios		1,2	2,1	1,2		1,2	1,7
Infec. respiratorias	1,2	1,2-H	1,2	1,2			1,4

Problema de salud	Edades / razón de prevalencia			
	14	12	6	4
Def. miembros	1,3	1,5	2,0	2,3
Síntomas locomotor	1,3	1,3	1,3	1,2
Esguinces	1,9	1,7		
Osteocondrosis	1,3	1,5		
Fracturas	1,4-M	1,2		
Sd. columna vertebral	1,2			

Problema de salud	Edades / razón de prevalencia						
	14	12	6	4	2	1	0
Sarna		1,4	1,3	1,4	1,4	2,3	4,8-H
Infecciones piel	1,2-M	1,2			1,3-H	1,7-H	1,3
Síntomas piel	1,2-M	1,2	1,3-H			1,2	1,2-H
Uña encarnada	1,5	1,6	1,2	1,5			
Dermatitis seborreica	1,4	1,3					
Quiste pilonidal	3,3	1,4					
Dermatitis de contacto						1,3	1,7
Dermatitis del pañal						1,3	1,3-H

Problema de salud	Edades / razón de prevalencia					
	14	12	6	4	2	1
Anemia ferropénica	1,4-H	1,9	1,3	1,2	1,2	1,3

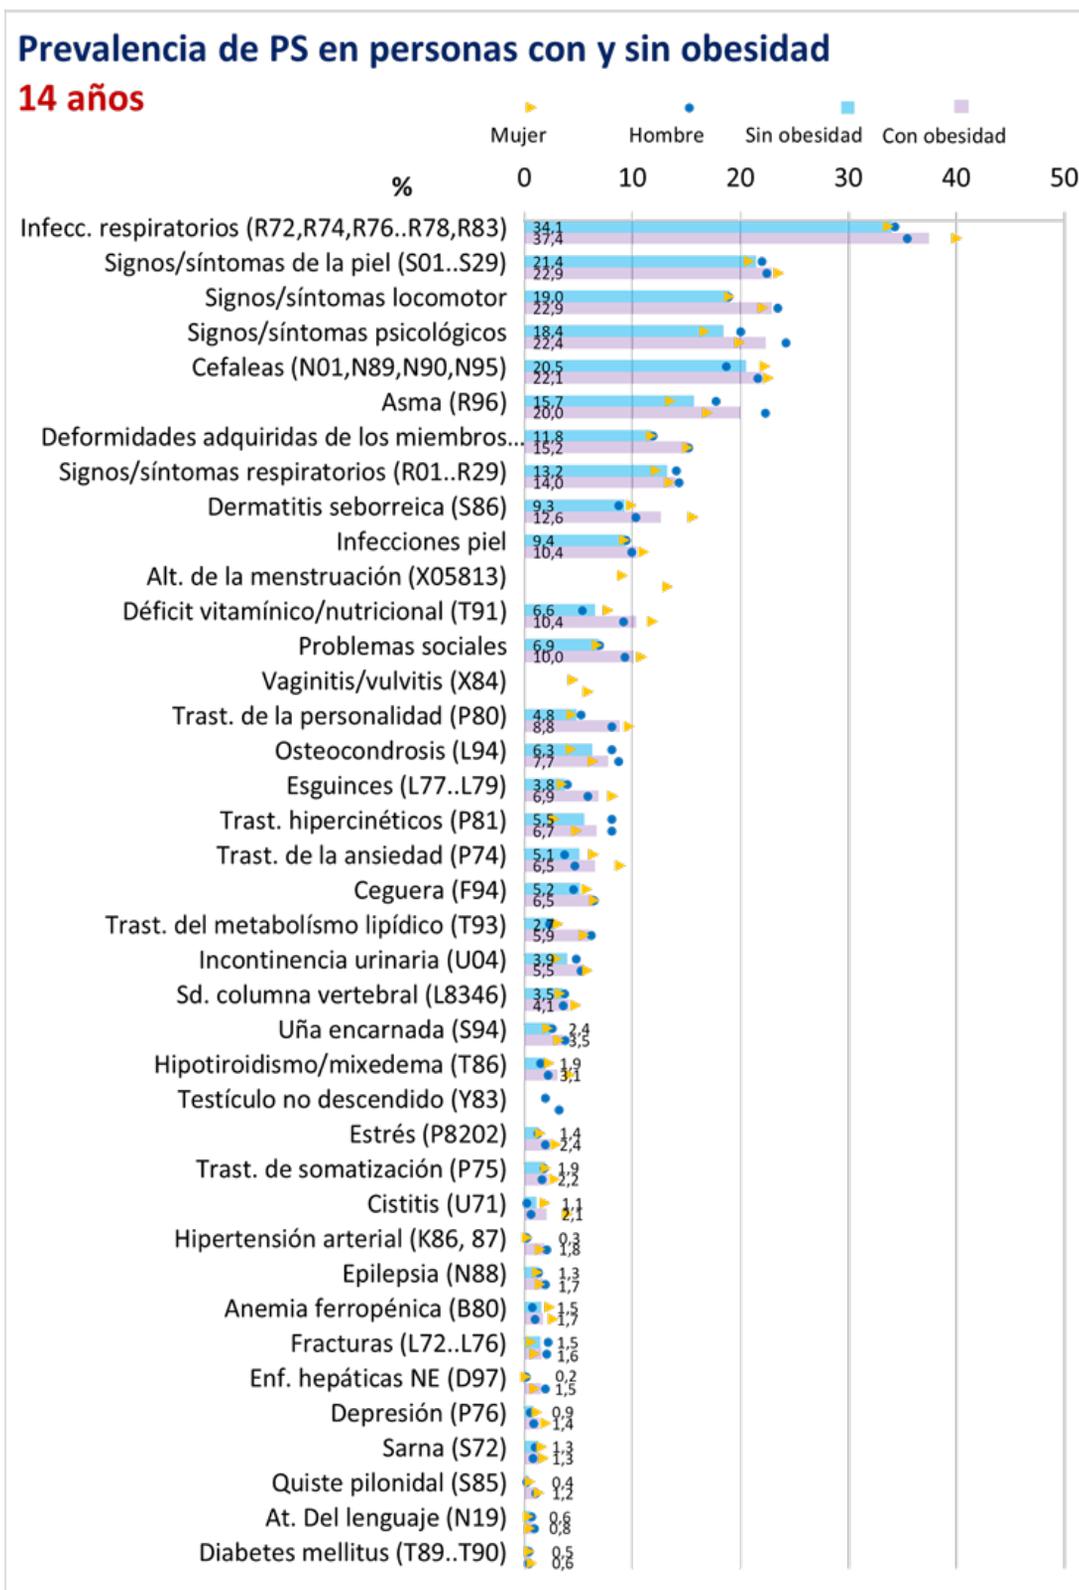

Problema de salud	Edades / razón de prevalencia			
	14	12	6	0
Enf. hepáticas NE	9,5	6,4	3,5	
A. Digestivo				1,4
Síntomas A. digestivo				1,6

Problema de salud	Edades / razón de prevalencia					
	14	12	6	4	2	1
Hipotiroidismo	1,7	2,0	1,8	1,6		
Déficit nutricional	1,6	1,6				
Trast. del metabolismo lipídico	2,3	2,1				
Prob. Alimentación					1,4	1,7
Diabetes mellitus	1,3					

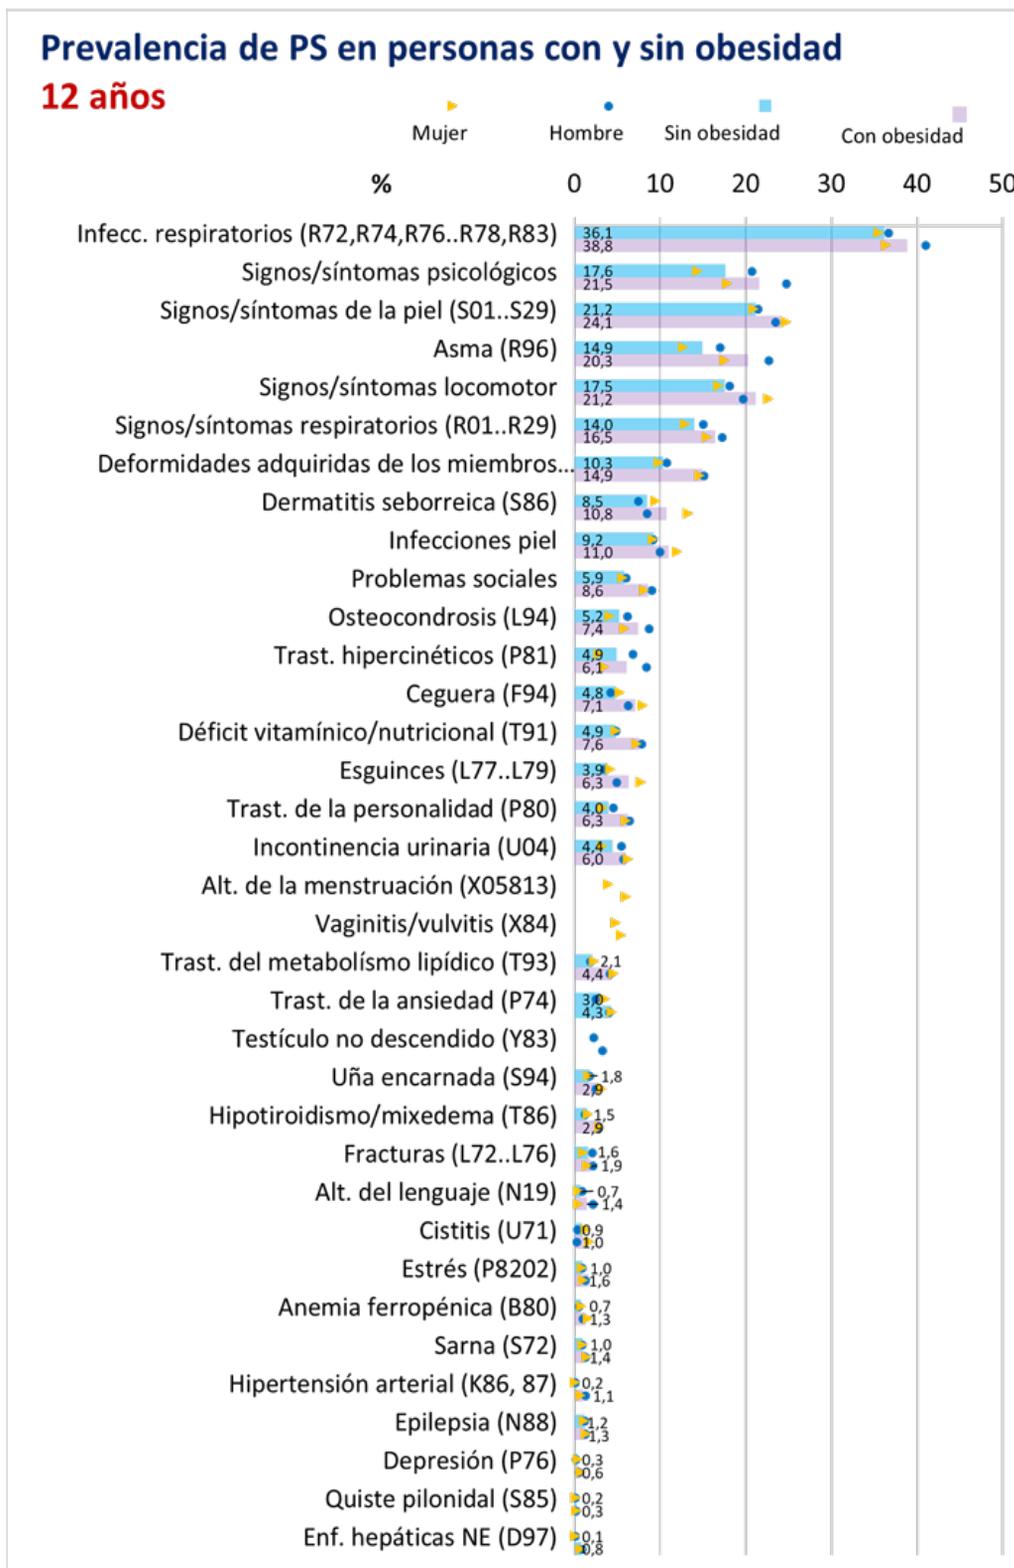

Problema de salud	Edades / razón de prevalencia			
	14	12	6	4
Testículo no descen.	1,7-H	1,5-H	1,5-H	2,1-H
Vaginitis	1,3-M		1,5-M	1,6-M
Alt. menstruales	1,5-M	1,6-M		

Problema de salud	Edades / razón de prevalencia				
	14	12	6	4	2
Cistitis	1,9	1,3-M	1,9	1,4	1,8
Incontinencia urinaria	1,4	1,4
